

Letter of Recommendation

KMT has successfully executed the relocation and upgrade of Food Industries Manufacturing Line

We are proud to announce the successful completion of our scope of work that included the electromechanical installation, commissioning, and restoring the machine to the base condition as per the Electrical Standards.

We are glad to receive the below recommendation from Eng. Steve

Hi Hani

On behalf of Flo-Mech and following the successful installation of the PCPPI FC line in Egypt, I am writing to recommend the services of both KMT as an electrical installation team and also yourself, as an individual.

You and your team were dedicated in carrying out given tasks, reliable and worked well under what was sometimes a difficult environment. Furthermore, as a person, you was detail-oriented, organized, and always open to constructive feedback, making our business relationship both effortless and pleasant.

I would recommend your company for any role in your given industry.

If you have any further questions, please feel free to contact me.

Systems, Services & Solutions for
the Food Processing Industry

Kind Regards,
Steve Senior
Project Engineer
